

RFID SIG Panel Discussion: RFID Delivering ROI through Process Improvement

HIMSS09

April 7 from 1:00pm until 2:30pm

Room W193 AB McCormick Place Convention Center

The HIMSS RFID Special Interest Group (SIG) is hosting a panel discussion of hospital users that have realized measurable financial and operational results from process improvements enabled by RFID-based systems. Panelists have been chosen to provide insights into their successful use of RFID-based systems to re-engineer processes and drive measurable financial and operational performance improvements within their hospitals and health systems.

Everyone is invited to attend. You do not need to be a member of the RFID SIG.

RFID-based Process Improvement Topics of the Panelists:

Kelly Arnold - Mobile Medical Equipment Management

Director Project Management

DeKalb Medical - Decatur, Georgia

Deborah Tuke Bahlman RN, MS - Managing Advancements in OR Workflow Automation
